Lady Raman

Rao Saheb Channaiya, Esq.,

Mr. Oosman Khan

Letter received from Mr. J. R. Issac expressing inability to attend.

We visited the Hospital to-day and were taken round by Dr. Nanjappa. We visited the cowshed where the cows were brought and were being milked. The milk was tested with the lactometer in our presence. We were also taken to the rooms where the milk is boiled and also to the European Kitchen and found the arrangements in all these places quite in order.

We then went round the Septic Ward and the women's wards on the first floor. We ~~are~~ are glad to note that the Electric Lift has arrived and is being fitted up. We are glad also to be told that a small ~~grant~~ extra grant was sanctioned for linen at the end of last month. The present annual grant for linen is quite inadequate and has to be substantially increased.

We desire to urge once more the pressing need for a latrine (flush) for the Out-Patient Dispensary.

Sd. K. R. Sreenivasa Iyengar

Bangalore City,
Dated 21st. September 1935.

Present:-

Lady Raman,
Rao Saheb H. Chennaya, Esq.,
J. R. Issac, Esq., B.A., M.B.E.,
Mr. Osman Khan.

We inspected the Hospital to-day and went round the wards for in-patients - Male & Female -, the Nose & the Throat Section, the Laboratory, & etc., with Dr. Nanjappa.

The number of in-patients is given as 284 including 172 Men, 87 Women and 25 Children. The daily average of Out-patients treated in the different Sections in August 1935 is stated to be 685.23 as against 676.3 in the corresponding month of last year. From our enquiries we found everything in order. The existing staff, though not quite adequate, is doing its best, like the previous ones, to cope with the heavy and responsible work of a large General Hospital like this, and Dr. Nanjappa and his Assistants deserve the thanks of the public for their labours in endeavouring to relieve the sick and the suffering, at considerable risk to themselves, instead of unfounded and undeserved criticism.

The supply of linen is represented to be insufficient and it is hoped that this matter will receive the attention of Government.

We noticed ~~that~~ some of the ^{roads} ~~wards~~ within the Hospital Compound ^{being} ~~were~~ used by the public as a thoroughfare between the Market and Chamarajpet. We suggest that steps should be taken to prevent this.

Issued.

N. 4. 3591 dt. 8/11/35

PRESENT:-

Rajasabhabhushana Dewan Bahadur K. R. Sreenivasa Iyengar, Esq., M.A.,
 Lady Ramen
 Rao Saheb Chennayya, Esq.,
 J. R. Issac, Esq., B.A., M.B.E.,
 Mr. Oosmon Khan.

A We visited the Hospital to-day and were taken round about all the In-Patient Wards. There was a good number of 'Enteric Patients' ~~am~~ and these were mixed up with other patients in the same ward. Though all possible precautions are being taken to prevent the spread of infection, there is always the danger of its spread. We therefore desire to reiterate the suggestion made by us at our visit on 24th. August to have a separate ward set apart for the accommodation of 'Enteric Patients' and others suffering from similar infectious diseases.

The In-Patients ~~whom~~ we questioned expressed themselves satisfied with the attention that was being given to them by the Hospital Staff.

B One of the In-Patients in the One Rupee Special Ward brought to our notice the great discomfort that was caused last night to one of the patients in the ward owing to the ward boy on duty not being available to answer an urgent call owing to his having been employed elsewhere. We were told that owing to the insufficient number of ward boys it was not possible to satisfactorily attend to the requirements of all the patients and that complaints of the nature mentioned above were therefore unavoidable however much the Hospital Authorities might try to satisfy them. Our attention was also drawn again in this connection to the inadequacy of the Nursing Staff to which we have referred in our note dated 20th. February 1935. The present strength of the Nursing Staff including Probationers is said to be about 28. On a rough calculation made by us we found that this number will have to be doubled, if full satisfaction is to be given to the patient. We would suggest that the

question

question of the increase in the strength of the Ward Boys and the other Nursing Staff may be fully gone into by the Senior Surgeon and action kindly taken to increase the Staff to meet at least the absolute minimum requirements of the Hospital.

We are glad to note that the Electric Lift has been fitted up and that it will be ready for use in a few days.

(Sd) K. R. Sreenivasa Iyengar.
